

Guderian's Blitzkrieg II (2011 Printing) OB Problems

Friday, May 25, 2012

Mike Willner & Joey Sabin have alerted us to quite a few counters from **Case Blue (CB)** that are needed to play the revised **Guderian's Blitzkrieg II (GBII)**. Following the list (which is hopefully complete) are guidelines for how to play the new **GBII** as a standalone campaign.

Note if you have both **GBII** and **CB**, you shouldn't have any missing units.

There will be 29 errata counters printed in the Summer 2012 issue of *Special Operations* that allow **GBII** to play fine without **CB**.

Abbreviations Used:

(ERP) = Emergency Pool

(TCB) = Transfer from Case Blue

(UEX) = Unit Exchange

* = Part of GBII errata counter mix

Roughly 96 missing ground steps and 12 air units.

What Happened?

Many of the refinements to the OBs that were made in **CB** did not get back-fitted to the 2011 printing of **GBII**. The good news is that the counter mix problems are mostly confined to what might be thought of as the overlap of the **GBII** and **EATG** campaigns — specifically, the Voronezh area — after mid-1942, so the game's focus on Operation Typhoon isn't really affected. But players who push their game into the war's second summer will find more and more missing units, and for this we are very sorry.

Fixes if you Do Not have Errata Counters:

Two different fixes are presented, depending on the scenario. They are written for the Campaign Games, but also apply to smaller scenarios.

Campaigns 7.1 to 7.4

1. For the 7.1 setup, substitute a 3-2-2 Brkdwn for the 3-2-3 Mot Inf Rgt (3) and (5)-1-1 UR Bde (5). Ignore the rest.

2. Try and find an appropriate substitute for missing units in the Dead Pile. If no good matches are found, give the missing unit's equivalent Pax/Eq.

3. These Campaigns now end on 1 April '42. The victory conditions are as follows:

The German score is the average of his final VP score (end of March) and his "high water mark" VP score (his highest VP level at end of any single turn). If the average is 60 or more, the game ends in a German Win. If the average is 50 or less, it is a Soviet win. Otherwise, it is a Draw.

Campaigns 7.6 to 7.8

1. Ignore all the missing Axis and Soviet ground units that aren't marked with an asterisk on the previous listings. For units marked with an asterisk, substitute with similar units in the Dead Pile. If no good matches are found, give the missing unit's equivalent Pax/Eq.

2. The bottom 1/2 of Map C and Map F is out of bounds. Ignore setups of units in or south of row xx.18.

3. For victory determination at the game's end, assume the Germans hold the VP cities in the area that is out-of-bounds: Voronezh and Staryy Oskol (8 points combined).

4. Reduce each side's supply column by -1.

Fixes if you Do have Errata Counters:

Two different fixes are presented, depending on the scenario. They are written for the Campaign Games, but also apply to smaller scenarios.

Campaigns 7.1 to 7.4

The fix to these scenarios does two things: it shortens the campaign's length and provides *most* of the AWOL counters.

1. Three Soviet units (total) are still missing from 26 Jan and 5 Feb: (5)-1-1 UR Bde (153, 156, 159). There should be dead units to substitute, but if not give 1x Pax per missing unit.

2. On 15 Mar, there is still a missing Soviet 12-2-2 Inf Div (416). There should be plenty of dead units to substitute.

3. These Campaigns now end on 1 April '42. The victory conditions are as follows:

The German score is the average of his final VP score (end of March) and his "high water mark" VP score (his highest VP level at end of any single turn). If the average is 60 or more, the game ends in a German Win. If the average is 50 or less, it is a Soviet win. Otherwise, it is a Draw.

Campaigns 7.6 to 7.8

The fix to these scenarios doesn't directly address a fair number of AWOL counters. Instead it reduces the map area in play, so those counters aren't needed.

1. The southern play boundary is shifted north by 1/2 a map, so hexes on or south of Map C/F xx.18 are out of bounds.

2. For victory determination at the game's end, assume the Germans hold the VP cities in the out-of-bounds area: Voronezh and Staryy Oskol (8 points).

3. Reduce each side's supply column by -1.

4. Ignore all remaining missing Axis and Soviet ground units (the ones not part of the 37-counter errata mix in the issue of *Special Operations*).
